

Primary care that continues beyond the visit

New concerns. Ongoing conditions. A completed visit can still leave care unfinished.

Trust-Time coordinates accepted care with named owners and capacity

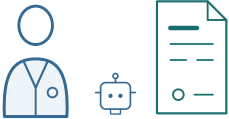

Adopted policy

01 Assess needs

Patient + clinical team
Concerns, history + urgency

02 Agree the plan

Plan + named owners
Tests, medicines + follow-up

03 Deliver care

Laboratory + pharmacy
Automation where qualified

04 Review + follow up

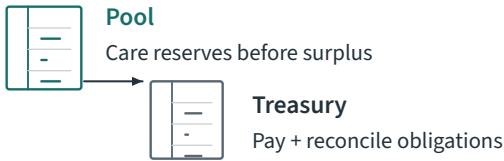

Results + next steps
Review + continued care

Complete Institutional Event

Permissions, work, results + obligations

Corrections return to affected owners

Sustain the work

Issuer backing remains separate.

Provider Trust Index (PTI)

Service-specific performance across episodes

Follow-up slot missing

Owner: primary-care nurse

Contact patient + arrange next step

Codex

Reserve result review and follow-up when ordering tests?

Patient voice + expertise

Compare, evaluate + vote

Authorize, monitor + revise

Incentives under adopted reward terms

Relevant proposal weight under voting rules

THEON Healthcare foundation models + multi-agent research

Independent evaluation

Authorize + monitor use

--> Future care + research
